

# INTRODUCING VIRTUAL DAT

## AN INNOVATIVE VIRTUAL DRIVER AWARENESS TRAINING SOLUTION FROM CARDINUS

### A New Concept

Virtual DAT is a new concept in driver awareness training allowing companies to meet their duty of care needs for high risk business drivers, whether they use cars, vans or trucks.

### Virtual DAT Explained

When an at-risk driver is identified, either via a risk assessment, high mileage, accidents record or telematics data, the driver is invited to an online meeting lasting 1 hour with one of our expert driver trainers. The session includes:

- Introductions and scene setting – Why is the driver high risk?
- Objectives of the session
- Driver behaviour and influences – Video-based discussion
- Hazard spotting
- Common distractions and how to avoid them
- Speed, Tailgating, Fatigue
- C.O.A.S.T methodology
  - Concentration
  - Observation
  - Anticipation
  - Space
  - Time
- Agreed actions

**A 1-hour  
Virtual DAT  
costs £70  
+ VAT**

At the end of the session a report will be produced setting out the agreed actions as well as a training certificate.
