INSERT YOUR LOGO HERE

# Move more, feel better

Stand up and change your position frequently.  
Aim to **move every 15 to 20 minutes** or whenever  
you notice poor posture or experience fatigue.

# Three tips for elated arms and stress-free movement

Make sure your **wrists do not bend** up, down or sideways while using the keyboard or mouse.

Make sure your seat **height is adjusted** to help prevent shrugging or hunching your shoulders.

Make sure you do **not need to overstretch** or reach for your mouse or keyboard.

INSERT YOUR LOGO HERE

120° ← → 90°

# Are you sitting comfortably?

Adjust the tilt of your backrest so that your **upper body is leaning back slightly**. An angle of 90°-120° is (usually) most comfortable.

INSERT YOUR LOGO HERE

# Three tips for monitor happiness

## Position is key

Ensure your monitor is free from glare and reflections

## Eye level

Your eyes should be level with the top of the screen's viewing area

## Arm's length

Keep it at arm's length (roughly) so you do not strain your eyes

INSERT YOUR LOGO HERE

# Look into the future

Staring at one point places prolonged stress on the eye muscles. **Every 20 minutes focus on a distant object for 20 seconds**, allowing your eyes to relax and recover.

# If you're dining, don't go 'al-desko'

As many as two thirds of office workers eat lunch at a desk. This is bad news for productivity and mental fatigue. So get up from the desk and **hit the break out room!**

INSERT YOUR LOGO HERE

# Do you feel supported?

To help your back support your weight, **your feet should be flat on the floor or supported by your knees**, which should be positioned slightly lower than your hips.

# Jump up and get down!

Get up and move around periodically so that you aren't using the computer for long periods of time without a break. **A 10 minute break every hour should help!**
